24X7, FULL-SERVICE UNIFIED CONFERENCING SERVICES

VIDEOCONFERENCING

Precision Videoconferencing Solutions is a true 24X7, full-service communications company offering reasonably priced, turnkey products and services assisting businesses to successfully incorporate the use of videoconferencing technologies. In business since 1991, our capabilities include:

- Multipoint bridging
- Local and worldwide facility rentals
- Mobile "onsite" events
- Conference management services
- Equipment sales and installation
- Custom room integration
- VideoView Streaming service
- VCAdvance public facility directory

You can rely on **Precision Videoconferencing Solutions** for all your communications needs.

Precision Videoconferencing Solutions offers high quality, low cost bridging and gateway services to small and enterprise level companies.

BRIDGING SERVICE

Precision Videoconferencing Solutions video bridging service is necessary when you want to connect a videoconference with three or more sites. Connecting ISDN and IP locations is a breeze through **Precision's** video gateway service. The scope of our availability is truly 24x7. Although we are located in the mountain time zone, we operate our business in YOUR time zone! Ad-hoc conferences are no problem at all. We can put up your conference in a matter of minutes. **Precision Videoconferencing Solutions** offers unmatched service and quality with very reasonable rates!

VIDEOVIEW STREAMING

Precision Videoconferencing Solutions' new video streaming service called **Video-View** allows you to present your program from your videoconferencing suite, while any number of viewers can access your videoconference right over the Internet. **Video-View** can also allow for the presentation of PowerPoint slides and can be email enabled to ask direct questions of the presenter. **Call for details!**

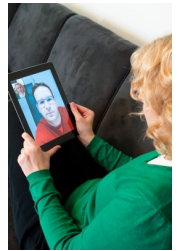

VCADVANCE

VCAdvance is our new public videoconferencing room directory. Check it out at www.vcadvance.com. Search by zip code or state/country. Vcadvance is the most comprehensive public room directory on the internet.

CLOUD SERVICES

Precision's new Cloud Services offering allows for a quick, reliable and cost effective way for companies to connect all of their remote employees anywhere in the world using only their iPhone, iPad, PC, Laptop or Android smart device! No more worries about firewall traversal or bandwidth restrictions. We make connection SIMPLE. Purchase only the connection time you need or buy in bulk - two ways that make total sense for your organization! Ask one of our representatives for a demo of this service - you will be amazed at the quality!

SATELLITE DOWNLINK & REBROADCAST

Precision Videoconferencing Solutions has the ability to downlink your satellite broadcast feed and transmit it via H.320 or H.323 to any other videoconferencing facility across the United States and abroad. Our 7.5 meter C-band and Ku-band dish allows us to track any of the satellites in orbit over the southern hemisphere. We are also able to record the feed on videotape and even stream your program out to viewers over the Internet.
